

Oral Screening Clinic

Preventative soft tissue screening to detect oral abnormalities

Tuesday, May 12 • 3 pm to 8 pm
66th Avenue, Langley

Did you know?

The risk of oral cancer is about 5 to 10 times greater among smokers than non-smokers, and this risk is further increased among smokers who also drink alcohol.*

*Health Canada: Smoking & Oral Cancer

Book your appointment today.

Registered dental hygienist, Stacey Rhodes-Neset, will perform a non-invasive oral screening to inspect for any soft tissue abnormalities, such as infections, inflammations or other oral conditions.

A \$25 fee will apply, of which \$5 will be donated to the BC Oral Cancer Prevention Program.
